

AGRICULTURAL BUDGET CALCULATOR

ONLINE CROP ENTERPRISE BUDGETING TOOL

Available now! Whole-farm cash flow and livestock enterprise modules coming soon.

The Ag Budget Calculator (ABC) is a FREE enterprise budgeting program that provides cost and return metrics useful in production, cost control, and other management decision-making. It is designed to assist agricultural producers in determining their cost of production and projected cash and economic returns for their various farm or ranch enterprises.

Web-based Program

User-friendly, ABC is compatible with PC and Mac and accessible on mobile.

Integrated UNL Crop Budgets

Download and modify university crop budgets right in the program.

Revenue Projections Included

Determine projected net returns above costs.

Custom Budgets and Reports

ABC is completely customizable by farm or field. Data is saved and can be updated for future seasons.

The University of Nebraska–Lincoln’s Department of Agricultural Economics and Center for Agricultural Profitability invite producers and farm managers to begin using the online Agricultural Budget Calculator (ABC) program. The new program allows producers to estimate their cost of production based on field operation expenses, machinery, labor, and material inputs.
